- The MAILING DATE of this communication appears on the cover sheet with the correspondence address - Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/26/06 has been entered.

Claim Rejections - 35 USC § 102

- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-5, 7-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Haigh (456,257). Haigh discloses, in fig. 1, a stopper assembly comprising a screw stem body C having a tapered end c, and a thread portion C; an elastic enclosure B having a tapered head; a retention housing A fitted to the elastic enclosure B, the retention housing having a key held in a key opening on the housing to prevent rotation of the housing about the body, a stop nut e' and a turning nut D attached to the retention housing and the body; and wherein the retention housing includes a retention cap A and a gripping cup a (see fig. 5).

Application/Control Number: 10/802,896 Page 3

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 1-4, 6, 7 and 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ljungberg (2,062,519) in view of Condon (5,307,841) or Turnwald (6,607,087).

Ljungberg discloses a stopper assembly comprising a screw stem body 10 having a tapered end 2 and a thread portion 7; an elastic enclosure 6 having a tapered head, a retention housing 13 fitted to the elastic enclosure, the retention housing having a key (inner thread) held in a key opening (outer thread of the housing) on the housing to prevent rotation of the housing about the body, a gas passage way 10, a second threaded portion 14 on the body and a valve stem assembly threaded onto the second threaded portion (see col. 2. lines 1-4), a stop nut 4 and a turning nut (see col. 2, lines 4-6) attached to the body.

Ljungberg does not teach the turning the turning nut attached to the retention housing and the body.

Condon or Turnwald teaches nut attached to a retention housing and a screw stem body.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a turning nut attached to the retention

Art Unit: 3754

housing and the screw stem body in the Ljungberg invention, in view of the teaching of Condon or Turnwald, in order to stabilize the turning nut with the retention housing and the screw stem body.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIEN TM NGO whose telephone number is 571-272-4545. The examiner can normally be reached on Monday through Friday from 8:30 AM -6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MICHAEL MAR can be reached on 571-272-4906. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
